COVID-19 VACCINES

Vaccines keep you and those around you safe.

COVID-19 vaccines are proven to be safe and effective for everyone 6 months and older. Vaccines are also safe for people who are breastfeeding or pregnant and individuals with chronic conditions like diabetes and hypertension.

Vaccines are free to everyone living in the United States, no matter your immigration status. Your personal information will not be shared with the federal government or immigration agents.

You should get vaccinated even if you had COVID-19. Vaccines provide additional protection and may help against variants of the virus.

Vaccines strengthen your defenses to fight against COVID-19 and its variants. They are safe and effective at preventing serious illness, hospitalization or death due to COVID-19.

Minor side effects can occur after vaccination and are <u>normal</u>. Your arm may be sore or you may have cold-like symptoms for a couple days.

Everyone 6 months and older is eligible to be vaccinated. You can find the current vaccine schedule and recommendations at covid19.ca.gov. Staying up to date with your vaccinations is important to prevent serious illness.
